Instructions for completing the 2000 Commercial Operator's Annual Report

Buying Information (Forms A (1-3), C (1-2), E, G, I (1-2), K) :

If you are a fisherman who processes, exports, and/or sells your **own** catch (i.e., catcher/exporter or catcher/processor), the **Buying Forms DO NOT PERTAIN TO YOU!!!** Proceed to "Production Information".

This is the amount paid to fishermen by your operation and refers specifically to species, weights, areas, gear types, and delivery codes that are listed on fish tickets filled out using your company's processor code. Complete the forms for each appropriate Fishery based on the previous check form on Page i. Fill out the appropriate sections for each species purchased on each form that pertains to your operation. List the number of pounds purchased by each gear group in each harvest area, and the total amount paid to the fishers. Please include all POST-SEASON adjustments and/or BONUSES including credit received by fishermen for gas expenses, ice, delivery premiums, and other miscellaneous expenses.

If you think ADDITIONAL adjustments may be made after this report has been filed, please check the "\$ NOT FINAL" box, and submit FORM M when those adjustments are paid. **DO NOT** include fish purchased by you from another licensed processor (where they wrote the fish ticket).

Production Information (Forms B (1-6), D, F, H, J (1-2), K):

List only the production done by your company. This includes both **processed and unprocessed** seafood for which your company wrote fish tickets. Use **FORMS L (1-2)** for all production done for you by **another** company (Custom Production). List all production for each Fishery that pertains to your operation based on the previous check form on Page i. Indicate each species, area of processing, product processed, total weight of the finished product, and the total wholesale or retail value of that finished product on each form which applies to your operation. Do not combine different species, areas, processes, or products on the same line. Enter a retail value, if that is how your product is marketed by you.

The "Total Value (\$)" is the amount that the processor receives for the finished product (FOB plant or vessel within the State of Alaska). For products finished but not yet sold (still held in inventory), calculate the estimated value using the average price received to date for that product.

When entering the process code, note that there is a prefix and suffix required. The boxes at the bottom of the form contain choices for selection of those codes. For example, you have 21,000 pounds of Pink salmon that was minced and frozen into blocks in Kodiak. The appropriate codes would be as follows: Area of Processing = K; Process Prefix = 02; Process Suffix = B; Product = 31; then enter weight and the total dollar value.

Questions???? Call the Alaska Department of Fish and Game at: **(907) 465-6131.**

Custom Production Information (Form L (1-2)):

List all production **done FOR YOUR company/operation, BY ANOTHER company/operation.** Use the previous applicable *Fishery Forms* to look up and enter the species name(s) and species code(s) which apply. Process and product codes are located on the bottom of the form. Additional product/delivery, area, and gear codes can be found on the **Master List, Page iii.** Protocols for entry are essentially the same as for Production mentioned above.
